Apr 2014-Mar 2015

RELEVANT PROJECTS

Job Portal

- This is a Candidate and Client based React project.
- In this project, clients post jobs and candidates are applying for those jobs.
- I had implement a chat section for conversation between client and candidate.
- For storing data and the login system I use Firebase .
- Tech uses:-ReactJS, MUI , Firebase , React-Router-Dom.
- Github Link:-Job-Portal.
- Deploy Link:-Job-Portal-netlify.

Food App

- This is a Food Web project.
- In this project user select an item for eating and order.
- In this project I had create two sections only first is home page where user can select an item to order and second section add to cart section where user will how many items in the cart.
- For changing of pages i have used here React-Router-Dom and for finding user select item I have used here Redux .
- Tech uses:-ReactJS, Redux , React-Router-Dom.
- Github Link:-shop-now.git
- Deploy Link:-shop-now.

MERN Todo App

- This is a mern project with all crud operations.
- This project have three sections first is sing up page second is login page and third is dashboard page.
- I have made this project in EJS so every component is rendered on server.

- In this project user can write down notes for remember that work and no one without his username and password access these notes.
 - In this project I have used validator for encrypting the password and for storing data I have used here Mongodb and for controlling the request from the user I have used here rate limiting like advance techniques.
 - Tech Uses:-NodeJS , ExpressJS , EJS , MongoDB.
 - Github Link:-Mern Todo APP.
 - Deploy Link:-Todo App.
